Geometrical Vectors

Author: Gabriel Weinreich

Publisher: Dev Publishers & Distributors

Edition: First

Year: 2020

Dimension: 15 x 23 cm

No. of Pages: 126

Weight: 200 gm

ISBN: 9789394852754

Binding: Softcover

Territory: South Asia

Price: Rs 795

About the Book

Every advanced undergraduate and graduate student of physics must master the concepts of vectors and vector analysis. Yet most books cover this topic by merely repeating the introductory-level treatment based on a limited algebraic or analytic view of the subject.

Geometrical Vectors introduces a more sophisticated approach, which not only brings together many loose ends of the traditional treatment, but also leads directly into the practical use of vectors in general curvilinear coordinates by carefully separating those relationships which are topologically invariant from those which are not. Based on the essentially geometric nature of the subject, this approach builds consistently on students' prior knowledge and geometrical intuition.

Written in an informal and personal style, *Geometrical Vectors* provides a handy guide for any student of vector analysis. Clear, carefully constructed line drawings illustrate key points in the text, and problem sets as well as physical examples are provided.
