**Price:**Rs. 1195

### About the Book

Written by a 30-year professional in the Pakistani Army who played a senior role formulating and advocating Pakistan's security policy on nuclear and conventional arms control, this book tells the compelling story of how and why Pakistan's government, scientists, and military, persevered in the face of a wide array of obstacles to acquire nuclear weapons. It lays out the conditions that sparked the shift from a peaceful quest to acquire nuclear energy into a full-fledged weapons program, details how the nuclear program was organized, reveals the role played by outside powers in nuclear decisions, and explains how Pakistani scientists overcome the many technical hurdles they encountered. Thanks to General Khan's unique insider perspective, it unveils and unravels the fascinating and turbulent interplay of personalities and organizations that took place and reveals how international opposition to the program only made it an even more significant issue of national resolve.

### About the Author

Brigadier General (retired) Feroz Khan is a lecturer in the Department of National Security Affairs at the Naval Postgraduate School, Monterey. He served with the Pakistani Army for 30 years, most recently as Director, Arms Control and Disarmament Affairs, within the Strategic Plans Division.
